India's Leading Sheet Metal Components / Products Manufacturer
Furniture | Automobiles | Home Appliances | Networking | and Other Industries

ABOUT US

Prarthna Manufacturing Pvt. Ltd. is a leader in sheet metal products in India. With operations across Bhandup and Khopoli near Mumbai, we deploy state-of-the-art systems and processes to manufacture various types of sheet metal products, components, parts, and articles. Our ISO 9001 and ISO 14001 certifications are a testimony to our excellence in product design and quality.

OUR LEADER

The brains behind Prarthna, Mr. Pravin Panchal is an engineer with over 15 years of experience in the field of manufacturing of sheet metal products and possesses all the relevant skills required to thrive in this industry. Under his guidance and leadership, Prarthna grew from its humble beginnings into a large-scale manufacturer of sheet metal products that it is today.

EARLY YEARS

Prarthna Manufacturing was established in 2013 by Mr. Pravin Panchal, an engineer with over decades of experience in the sheet metal manufacturing industry. It was back in 2003, that we had our humble beginnings. We started with a single power press and associated with Godrej & Boyce Mfg. Co. Ltd., the manufacturing and processing behemoth, for small punching jobs.

Soon, we started to flourish. With the inclusion of a few more machines in the following years, we expanded our capabilities. From manufacturing small-sized press components, we branched out into bending parts as well.

We initially started with a proprietorship firm at Vikhroli, called 'Quality Manufacturing Company', and were associated with M/s. Godrej & Boyce Mfg. Co. Ltd. for Value Engineering activities in 2007-2008. In 2010, we further expanded our horizons and undertook the business of powder coating - a batch type plant at Vikhroli for the coating of small press parts.

Throughout the journey, we never stopped learning. Our expansion took place alongside the learning process. We joined the Godrej CII cluster group to learn basic cluster activities and the nuances of business planning.

CONTINUOUS GROWTH AND EXPANSION

In the following years, we experienced continuous growth and expansion. We added a used Amada make CNC Turret Punch Press to take-up punching activities. Later, we applied for and were granted the ISO 9001 and ISO 14001 certifications for our Vikhroli unit.

A major physical expansion took place when we purchased a plot for setting up a factory at Khopoli in 2011. In the following four years, we completed the construction and equipped the factory with CNC Turret Punch Press - AE 2510 NT with CNC press brakes, power presses, etc. We also completed a fabrication set up with an automatic conveyerized powder coating plant in 2015 and started with a few products of Godrej & Boyce mfg co. Ltd. (Interio Group).

It was a moment of pride for us when we finally converted the Proprietorship company into a Private Limited firm. From M/s. Quality Manufacturing Company, we incorporated as M/s. Prarthna Manufacturing Pvt Ltd.

'Prarthna' means prayer. We stand as a reflection of our values, which honour knowledge and expertise, along with timely action. At Prarthna, each one of us is geared to create world-class sheet metal products with an unwavering focus on quality and turnaround time.

OUR VISION

To grow continuously and become the partner of choice for customers seeking excellence in the manufacturing of sheet metal products.

OUR MISSION

To conform to sustainable best practices in all our processes and to aim for ongoing improvements in products and services for enhancing customer satisfaction at every touchpoint.

OUR VALUES

- Team Work
- Respect
- Speed
- Transparency
- Creativity
- Continuous Improvement

OUR INFRASTRUCTURE

Prarthna Manufacturing has two industrial set-ups, one in Bhandup and the other in Khopoli. With a range of strengths between 10 T to 100 T, we have a combined unit of power presses to undertake all types of commercial-level punching assignments. Sets of Press Brakes, NC Press Brakes and CNC Press Brakes equip us to do all kinds of bending operations.

We also have the CNC Turret Punch Press (Make Amada and Model - Wipros /AE 2510 NT) both for punching work in metal sheets. To assemble the parts into a whole, we are even equipped with a set up for spot welding. We also have a CNC tube bending machine 5 axis, to do bending work in tubular products and sheet metal fabrication.

QUALITY POLICY

We are committed towards continual improvement (Kaizen 5S) for our products and services.

Through sustained efforts, we ensure the highest efficiency with minimal impact on the environment. Our production processes comply with the applicable norms and regulations, making us a transparent, trustworthy, and respectable supplier.

OUR CAPABILITIES

FURNITURE INDUSTRIES

At Prarthna Manufacturing, we work with some of the leading Indian furniture companies' demanding designs and specifications to manufacture high-quality sheet metal products for futuristic furniture designs. We have the capabilities and infrastructure to manufacture a wide range of doors, drawers, lockers, body, storage, and tubular products for all types of modern metal furniture designs.

Our sheet metal-based products find application in a wide range of furniture for indoor as well as outdoor settings. For example, our range of products for schools includes classroom lockers, file cabinets, gym lockers, laboratory furniture, and other custom metal furniture designs. We also create sheet metal products like tables, trolleys, single lockers, etc.

SWITCHGEAR INDUSTRIES

Prarthna Manufacturing has the required skills and infrastructure for manufacturing high-quality components for switchgears. We understand that switchgears are a mission-critical component and hence require highly specialized components. We offer high-performance products for power generation and distribution requirements too.

AUTOMOBILE INDUSTRIES

We understand that sheet metal components are highly critical for the performance, stability, and safety of an automobile and require extraordinary levels of craftsmanship. We have the in-house capabilities (power press electrically operated machines) for HR and CR (Hot Rolled and Cold Rolled) operations performed by using power press like pressing, piercing, cutting or notching operations to get the final output - which is a sub part of any assembly of automobile industries.

WAREHOUSE INDUSTRIES

At Prarthna, we believe that efficient space utilization, quality, and reliability of storage shelves are some of the key aspects for the success of a warehouse. At Prarthna, we manufacture some of the finest quality components required for future-ready storage solutions at warehouses.

KITCHEN METAL PRODUCTS

Prarthna is one of the leading sheet metal component manufacturing vendors, offering a wide range of metal shutters and metal storage cabinets. With an unwavering focus on design and aesthetics, we collaborate with some of the celebrated kitchen furniture manufacturers in India to offer highly-specific, mission critical components and fittings.

HOME APPLIANCES

At Prarthna Manufacturing, we have the skills, infrastructure, and human resources to manufacture all types of sheet metal articles, products, components, and parts required in air conditioning units, refrigeration solutions, washing machines, dishwashers, etc. We have a proven manufacturing and production setup that allows us to manufacture high-quality products with the shortest possible TAT.

NETWORKING INDUSTRIES

We cater to companies manufacturing solutions for hardware and networking. We have the required skills, processes and expertise to conduct comprehensive testing at each stage. Our certifications, ISO 9001 for quality and ISO 14001 for sustainability, are testimonials to our dedication to achieving world-class products.

OTHERS

Prarthna Manufactures extends its capabilities, skills, experience, and infrastructure in metal sheet products to offer a wide range of plastic products. We have advanced injection moulding machines where we make plastic components like drawer handles, wardrobe, or table bottom levellers (for ground height adjustment), etc., used by furniture manufacturers.

AWARDS AND ACCOLADES

- Over the years, our dedicated and unmatched service has been recognized and rewarded with the following accolades.
- Best Suppliers Award as voted by the customer
- Best Kaizen Award by CII
- Inducted into the honourable Confederation of Indian Industry as a member
- We strive to continuously improve our products and services and to be recognized for our contributions to the sheet metal industry.
